"We are pleased with second quarter results driven by the strength of both our online music and social entertainment businesses," said Mr. Cussion Pang, Chief Executive Officer of Tencent Music. "The growth in our online music paying users accelerated during the quarter, with 2.6 million paying users added sequentially. We continued to expand our music content leadership by partnering with more music labels, as well as adding more content including music-centric variety shows, short-form videos and long-form audio such as audio books and podcasts. We strengthened our alliances to produce and distribute more high-quality original soundtracks, including our partnerships within the Tencent ecosystem to develop original music content for games, films and TV shows. In social entertainment, we not only effectively broadened our user base through mini-program and a lite version app, but also improved user engagement by adding new product features, especially social features with high user participation. We are pleased with our progress and confident that these initiatives will lead to further growth in the second half of the year."

Mr. Tony Yip, Chief Strategy Officer of Tencent Music, said, "For online music services, we pride ourselves in expanding our promotional capabilities to help an increasing number of both prominent and up-and-coming artists distribute digital albums, which are instrumental in helping artists gain popularity and build strong bonds with their fans. In order to provide users a consistent and cohesive listening experience, we are forging Internet of Things (IoT) partnerships with leading manufacturers of cars, smart speakers and smart watches, which will provide further channels for user acquisition. As part of our internationalization strategy, we are also looking to expand our social entertainment services outside of China, as we take initial steps to explore overseas opportunities for WeSing in South East Asia. These small steps we are pursuing will enable us to better serve users and expand our reach at both home and abroad."

"We achieved steady growth in the second quarter as our total revenues increased by 31% year-over-year to RMB5.9 billion," commented Ms. Shirley Hu, Chief Financial Officer of Tencent Music. "We have been firmly executing our strategy of investing in our products and content offerings, while improving our operating efficiency. Our efforts resulted in the growth of both our paying online music users and paying social entertainment services users. At the same time, we were able to maintain a healthy profit level as our non-IFRS net profit attributable to equity holders of the Company reached RMB1.13 billion in the quarter. In the second half of the year, we will build on this momentum of quality growth with effective execution as we strive to achieve long-term sustainable growth."

SECOND quarter 2019 Financial Results

Revenues

Total revenues for the second quarter of 2019 increased by RMB1.40 billion, or 31.0%, to RMB5.90 billion (US\$859 million) from RMB4.50 billion in the same period of 2018.

- Revenues from online music services for the second quarter of 2019 increased by 20.2% to RMB1.56 billion (US\$228 million) from RMB1.30 billion in the same period of 2018. The increase was mainly driven by growth in revenues from music subscriptions and sales of digital music albums, which was partially offset by the decrease in sublicensing revenues from other music platforms. Revenues from music subscriptions were RMB798 million (US\$116 million), a 31.9% increase from RMB605 million in the second quarter of 2018.
- Revenues from social entertainment services and others for the second quarter of 2019 increased by 35.3% to RMB4.34 billion (US\$632 million) from RMB3.20 billion in the same period of 2018, primarily driven by revenue growth in both online karaoke and live streaming services. The Company expanded the paying user base of its social entertainment services by 16.8% and increased ARPPU by 16.5% in the second quarter of 2019, compared to the same period of 2018.

Cost of Revenues

Cost of revenues for the second quarter of 2019 increased by 46.1% to RMB3.96 billion (US\$576 million) from RMB2.71 billion in the same period of 2018, primarily due to the increase in content expenses and revenue sharing fees. The increase in content expenses was mainly attributable to the increase in market prices and amount of licensed and produced music content. The increase in revenue sharing fees reflected the growth in the Company's social entertainment services as it offered users with more professional content and provided users with small incentives to interact on its services.

Gross Profit

Gross profit for the second quarter of 2019 increased by 8.1% to RMB1.94 billion (US\$283 million) from RMB1.80 billion in the same period of 2018. Gross margin was 32.9% for the second quarter of 2019.

Operating Expenses for the Period

Total operating expenses for the second quarter of 2019 increased by RMB217 million, or 26.1%, to RMB1.05 billion (US\$153 million) from RMB833 million in the same period of 2018. Operating expenses as a percentage of total revenues was 17.8% in the second quarter compared to 18.5% in the same period of 2018.

- Selling and marketing expenses for the second quarter of 2019 were RMB416 million (US\$61 million), representing an increase of 11.2% year-over-year from RMB374 million in the same period of 2018. The increase was primarily due to increased spending to promote the Company's products and brands and grow its user base.
- General and administrative expenses for the second quarter of 2019 were RMB634 million (US\$92 million), representing an increase of 38.1% year-over-year from RMB459 million in the same period of 2018. The Company increased its investment in research and development to expand our edge in products and technology, for example in its recommendation capabilities.

Operating Profit for the Period

Operating profit increased by 7.0% to RMB1.09 billion (US\$158 million) in the second quarter of 2019 from RMB1.01 billion in the same period of 2018.

Net Profit and Non-IFRS Net Profit for the Period

Net cash provided by investing activities for the second quarter of 2019 was RMB2.56 billion (US\$373 million), due to the maturity of term deposits invested during the first quarter of 2019, compared to net cash used investing activities of RMB251 million during the same period of 2018.

Cash, Cash Equivalents and Term Deposits

As of June 30, 2019, the combined balance of the Company's cash, cash equivalents and term deposits amounted to RMB19.90 billion (US\$2.90 billion), compared to RMB18.10 billion as of March 31, 2019. The increase in cash and cash equivalents was primarily due to cash flow generated from operations of RMB1.89 billion (US\$275 million). The Company's cash and cash equivalents balance was also affected by the change in the exchange rate of RMB to USD at different balance sheet dates. Non-IFRS Financial Measure

The Company use non-IFRS net profit for the year/period, which is a non-IFRS financial measure, in evaluating its operating results and for financial and operational decision-making purposes. Tencent Music believes that non-IFRS net profit helps identify underlying trends in the Company's business that could otherwise be distorted

by the effect of certain expenses that the Company includes in its profit for the year/period. Tencent Music believe that non-IFRS net profit for the year/period provides useful information about its results of operations, enhances the overall understanding of its past performance and future prospects and allows for greater visibility with respect to key metrics used by its management in its financial and operational decision-making.

Non-IFRS net profit for the year/period should not be considered in isolation or construed as an alternative to operating profit, net profit/loss for the year/period or any other measure of performance or as an indicator of its operating performance. Investors are encouraged to review non-IFRS net profit for the year/period and the reconciliation to its most directly comparable IFRS measure. Non-IFRS net profit for the year/period presented here may not be comparable to similarly titled measures presented by other companies. Other companies may calculate similarly titled measures differently, limiting their usefulness as comparative measures to the Company's data. Tencent Music encourages investors and others to review its financial information in its entirety and not rely on a single financial measure.

Non-IFRS net profit for the year/period represents profit for the year excluding a share-based accounting charge in respect of the issuance of ordinary shares to music label partners, share-based compensation expenses, net loss from investments, amortization of intangible and other assets resulting from the business combinations, and fair value change on liabilities of puttable shares.

Please see the "Unaudited Non-IFRS Financial Measure" included in this press release for a full reconciliation of Non-IFRS net profit for the year/period to its net profit/loss for the year/period.
